

PHLEBOTOMY FOR DENTISTS

Learn to draw blood and elevate your practice
with

Platelet-Rich Fibrin (PRF)

Unlock Natural Healing

Accelerate tissue regeneration using your patient's own growth factors.

Improve clinical outcomes for implants, socket preservation, and periodontal surgery.

100% autologous and biocompatible with zero synthetic additives.

In-Office Phlebotomy & PRF Masterclass

Hands-on blood draw training tailored specifically for dental professionals.

Safe, efficient, and ethical blood collection protocols in a clinical setting.

Seamless integration from the chairside draw to the centrifuge and membrane placement.

Course Highlights

Anatomy & Venipuncture Technique: Master butterfly needles and patient comfort.

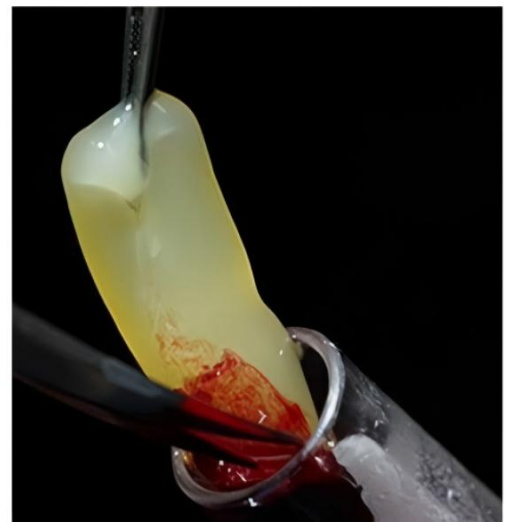

Centrifugation Protocol: Step-by-step processing for L-PRF and A-PRF.

Risk Management & Safety: OSHA compliance, waste handling, and emergency response.
